

Retrofitting Existing Services with MCP (Wilfred Doré & team Magellan for Mistral AI MCP hackathon)

Universal Interoperability Through AsyncAPI and Expert Systems

The Current Problem

Fragmented APIs, costly integrations, cold start

Our Approach

Automatic Retrofit via OpenAPI/documentation/Gen AI → MCP

Result

Universal interoperability in minutes, not weeks

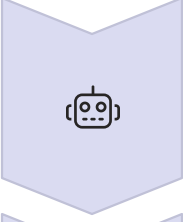

Concrete Example:
Akinator + Mistral

Expert system (Akinator) guides the user → Mistral Le Chat synthesizes → MCP orchestrates → Reliable and conversational prediction

Existing Services

OpenAPI, GraphQL, AsyncAPI specs

MCP Generation

Automatic typed connectors

Le Chat Integration

Real-time interoperability

AsyncAPI: The next frontier for event-driven interoperability - asynchronous notifications in Le Chat
